Interactive Public Peer Review™

- manuscript posted in the OS discussion forum
- public discussion by the scientific community
- open access to referee reports
- authors' revision and peer-review completion
- final journal publication – fully peer-reviewed

Aims and scope

Ocean Science (OS) is a not-for-profit international open-access scientific journal dedicated to the publication and discussion of research articles, short communications, and review papers on all aspects of ocean science: experimental, theoretical, and laboratory. The primary objective is to publish a very high-quality scientific journal with free Internet-based access for researchers and other interested people throughout the world.

Ocean Science covers the following fields:

- ocean physics (i.e. ocean structure, circulation, tides, and internal waves);

- ocean chemistry;
- biological oceanography;
- air-sea interactions;
- ocean models-physical, chemical, biological, and biochemical;
- coastal and shelf edge processes;
- paleoceanography.
