The great wave off shore of Kanagawa, Katsushika Hokusai, between 1826 and 1833: Library of Congress, public domain, via Wikimedia Commons. This is a faithful photographic reproduction of an original two-dimensional work of art.
Aims and scope

Ocean Science (OS) is a not-for-profit international open-access scientific journal dedicated to the publication and discussion of research articles, short communications, and review papers on all aspects of ocean science: experimental, theoretical, and laboratory. The primary objective is to publish a very high-quality scientific journal with free Internet-based access for researchers and other interested people throughout the world.

Ocean Science covers the following fields:
- ocean physics (i.e. ocean structure, circulation, tides, and internal waves);
- ocean chemistry;
- biological oceanography;
- air–sea interactions;
- ocean models–physical, chemical, biological, and biochemical;
- coastal and shelf edge processes;
- paleooceanography.
